## "GUESS THE – COIN"

Urzhin Aibolat SE-2330

---

Because this game  
is remembered in  
my head because in  
my life I always lost  
when I played with  
friends. So this  
game inspired me.

WHY I CHOOSE THIS  
PROJECT?

"Guess the Coin" could refer to a simple guessing game involving a coin, often used as a form of entertainment, decision-making, or as a gambling activity.

WHAT IS THE GAME ABOUT?

The game is also very simple as the name, you only need to choose the side of the coin that you think will fall out.

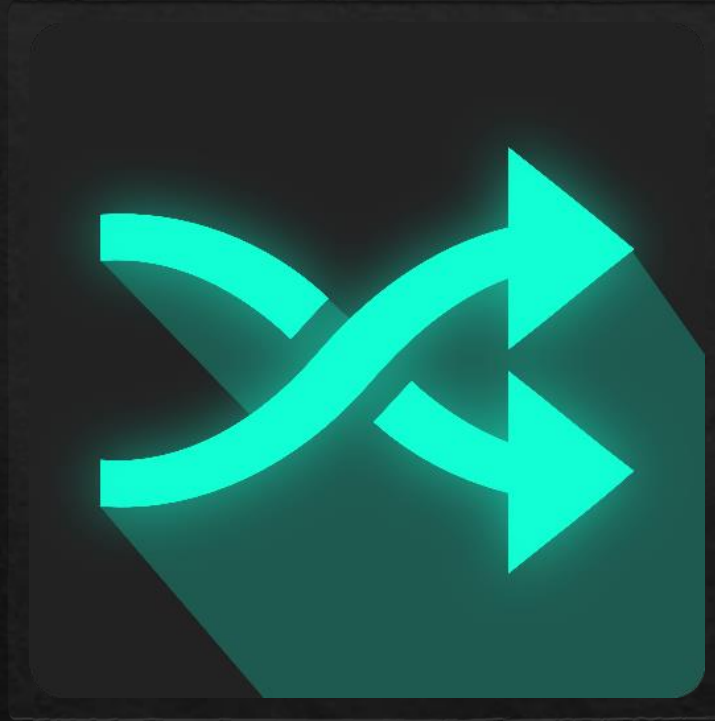

HOW TO PLAY THIS GAME?

The key figures of this game are heads and tails.

THE KEY FIGURES OF THIS GAME

Your enemy will be simple randomaier  
which twists a coin.

WHO IS MY ENEMY?

The game consists of 3 levels, and in each level you are given different chances. In the first level, you will have 5 chances to choose if you lose, then a window opens where you can choose to exit or start from the beginning, but if you win, then go to the second level where you have only 3 chances. Also, if you lose, the situation is the same as in the first level, but if you have passed this level, then the final one This means that the most difficult level gives you only 1 chance to win. If you play, you do not go down to the second one, but immediately to the beginning. But if you have passed this level, congratulations and the system automatically exits the game

**What are the levels in this game?**

# INTERFACE

The game interface is very simple, the initial screen welcomes you and you can continue to play, you will also be notified of defeats and victories

A close-up photograph of a hand holding a coin. The coin is gold-colored with a large number '1' in the center. The hand is positioned in the lower-left quadrant of the frame, with the thumb and index finger holding the coin. The background is a dark, textured surface.

The future and prompt of this game is very interesting since its very common type of game as well as it can be used in majority of spheres

THE FUTURE OF THIS GAME
